

# COOPER HOY

Ames, Iowa | 319-240-3504 | cjhoy@iastate.edu | cooper-hoy.com

## PROFESSIONAL SUMMARY

Infrastructure and security engineer with production experience across enterprise networking, firewall administration, and systems hardening. Deploys Cisco and Palo Alto environments, responds to live security incidents, and builds automation that removes manual work. Leads a 15-person technical team. Completing a Cyber Security Engineering degree in 2027.

## PROFESSIONAL EXPERIENCE

**RSM US LLP**, Des Moines, IA

May 2026 - Present

*IT Infrastructure Consultant, Network Optimization Consulting*

- Design and deploy enterprise Layer 2 and Layer 3 infrastructure including VLAN segmentation, 802.1Q trunking, inter-VLAN routing, and IP subnetting across multi-site client environments.
- Build and harden Palo Alto high-availability firewall clusters with NAT policies, virtual routers, GlobalProtect VPN, and alerting; deploy Cisco Meraki switching, wireless, and teleworker gateways.
- Detected and remediated an active FortiGate SSL VPN credential-spray attack; engineered automated response using FortiOS automation stitches to ban and release source IPs on authentication events.
- Execute live SD-WAN edge cutovers and ISP migrations, coordinating carrier turn-up with zero unplanned downtime.
- Deliver client-facing network diagrams, firewall rule audits, and implementation documentation.

**Iowa State University IT Solution Center**, Ames, IA

2023 - Present

*Team Lead, promoted 2026 | Senior Technical Support Analyst*

- Lead a team of 10 to 15 technicians supporting campus network, endpoint, and identity services.
- Built an onboarding and training program that reduced new technician ramp-up time from 6 weeks to 2 weeks.
- Troubleshoot escalated connectivity and authentication incidents; author knowledge base documentation adopted as team standard.

**Cambridge Investment Research**, Fairfield, IA

2024 - 2025

*IT Infrastructure Engineer, Hyper-Converged Infrastructure Team*

- Deployed Windows Server 2025 on VMware supporting Active Directory, DNS, and file services; designed a DMZ segment hosting a domain controller clone for disaster recovery failover.
- Developed hardening Group Policy Objects establishing a new endpoint security baseline enterprise-wide.
- Maintained 99.9% Exchange availability; led root cause analysis on infrastructure outages.

## TECHNICAL PROJECTS

**Knext - Automated Network Discovery and CVE Mapper**

2026

- Ingests Nmap scan output to generate network topology maps and correlate exposed services against published CVE data.

**NOCstock - Network Asset Inventory Platform**

2026

- Full-stack platform (Java, Spring Boot, MariaDB, React) with barcode intake, vendor API enrichment, role-based access control, and audit logging.

## EDUCATION

**Iowa State University**, Ames, IA

Expected May 2027

*Bachelor of Science, Cyber Security Engineering*

- Coursework: Networking Protocols, Introduction to Cybersecurity, Cryptography, Computer Architecture, Embedded Systems, Data Structures and Algorithms, Assembly Level Programming, Software Project Management.
- Deployed and hardened a full enterprise environment (LDAP, DNS, web, mail, security servers) and conducted penetration testing against live targets; designed a 5-stage pipelined RISC-V processor.

## LEADERSHIP AND VOLUNTEER EXPERIENCE

**FIRST Tech Challenge Robotics Mentor**, Grundy Center, IA

2023 - Present

- Mentor 30 or more students across three competitive robotics teams in mechanical design, Java programming, and engineering documentation.

## TECHNICAL SKILLS

**Networking:** VLAN, 802.1Q Trunking, Inter-VLAN Routing, OSPF, STP, EtherChannel, NAT, ACL, DHCP, DNS, IP Subnetting, TCP/IP, SD-WAN, Cisco Catalyst, Cisco Meraki, Packet Tracer

**Security:** Palo Alto Networks, FortiGate, GlobalProtect, IPS/IDS, VPN Security, Incident Response, Vulnerability Assessment, Penetration Testing, Group Policy Hardening, RADIUS, MFA, Nmap, Wireshark

**Systems:** Windows Server, Linux, VMware, Hyper-V, Active Directory, LDAP, Exchange, DMZ Design, Disaster Recovery, Hyper-Converged Infrastructure

**Development:** Python, PowerShell, Bash, Java, Spring Boot, C, Git, REST APIs, MariaDB, LangChain, Automation Scripting
